

ePayPoint

Cash Receipts Service

With *ePayPoint Cash Receipts Service* from Internet Payment Exchange (IPayX), patient and non-patient payments (including cash) can be made for all goods and services through a single system at any location, at any time, minimizing payment issues, reducing confusion and increasing control over the cashiering process.

Increased customer satisfaction up to 65%

*The fully automated cashiering service specially designed for **healthcare enterprises**.*

Benefits:

- **Increase Control**
- **Accelerate Cash Flow**
- **Improve Customer Service**
- **Enhance Customer Satisfaction**

ePayPoint Cash Receipts Service offers these powerful features:

- The ability to take payment on behalf of any facility within the enterprise
- The ability to handle all patient and non-patient payments in any form, at any time
- The standardization of cash collection and other payment procedures across healthcare enterprises
- The facilitation of centralized or distributed pre-service and pre-registration systems
- The ability for users to easily research discrepancies
- The ability to manage payment collections across a facility, or across the country, on a single system

Leverage our Technology

Put the power of IPayX to work for you! Reap the benefits of secure customer enrollment, instant data availability, payment capabilities for customers and customer service agents, interactive communications, extensive reporting mechanisms and exact transaction histories.

ePayPoint Cash Receipts Service

What you get

With ePayPoint Cash Receipts Service, you get:

- Card swipe and check readers that provide control over cash, check, credit or debit cards from a single work station
- Control of cash flow and customer receipting for all transactions
- Three primary file interfaces — Electronic Remittance Advice, Healthcare Information System and General Ledger Transaction Files — used to convey information regarding transactions to other systems
- Role-based security
- Central and Individual Cash Drawer and Vault Management tracking
- Real-time payment processing
- Support for back office conversion of paper checks to electronic transactions

ePayPoint

Cash Receipts Service benefits:

- Increase cash flow velocity
- Improve management and utilization of cash
- Significantly reduce the time and effort required for reconciliation and balancing
- Increase the productivity of every department involved in accepting and managing payments
- Increase customer and employee satisfaction
- Simplify the development and retention of collections management and statistical data
- Reduce payment shrinkage through increased controls
- Provide economies of scale by enabling centralization of functions

The screenshot displays a web-based payment interface. At the top, it says "General Hospital - Gift shop - Centralized". Below this, there are several fields: "Collector:" with a dropdown menu showing "ipxadmin - IPAYX Admin"; "AutoPay:" with a checkbox "Check if recurring or future dated payment"; "Type:" with radio buttons for "Patient" and "Non-Patient" (selected); and "Payment Method:" with radio buttons for "In Person" (selected), "By Phone", and "By Mail". Below these is a "Non-Patient Payment" section with a sub-header "Complete the form and click on the payment method button". This section includes: "Item:" with a dropdown menu showing "Retail Sales" and a "Quantity:" field with "1" and an "Add Item" button; "Paid By:" with a text input field; "Phone:" with a text input field; "Driver's License:" with a text input field; "Amount:" with a text input field showing "0.00"; and "Memo:" with a text area. At the bottom of the form are three buttons: "Credit / Debit Card", "eCheck", and "Cash or Check".
